Washington, DC 20554

Dear The Federal Communications Commission,

My husband and I do not want to pay more for our telephone service! We both urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. We are concerned that this proposal could make our current service unaffordable and we would have to cut out more and more somewhere as much as we can.

Under the flat fee proposal you are considering, people who make few long distance calls (as we seldom do) would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is highly unfair on your part when you are to protect us!

We use one wireless phone for safety, security and convenience. We don't want to lose these benefits so that big businesses can pay less than their fair share. We both urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Sid & Joyce Fair
